PROFESSIONAL EXPERIENCE

Naval Sea Systems Command-NSWC Corona Division, Corona, CA

October 2025 – December 2025

NREIP Systems Engineer Intern

- Developed interactive Tableau dashboards to visualize and analyze Naval Submarine data, enhancing decision-making processes.
- Automated data cleaning and preparation using Python (Pandas, NumPy), improving data efficiency in systems maintenance.
- Created visualizations to interpret the lifecycles of various Navy assets, supporting predictive maintenance strategies.

UCSB Arts and Lectures-Financial Department, Santa Barbara, CA

January 2025 – December 2025

Jr. Financial Analyst

- Streamlined invoice processing by organizing and labeling PDF invoices with Microsoft Excel, maintaining payment tracking logs, and coordinating department approvals to ensure timely disbursements.
- Managed expense reporting of transactions in Gateway, assigning cost types/fund codes/reconciling flex card.
- Supported a \$10M+ annual budget by performing data entry and account categorization in UCSB's financial systems (Gateway and GUS), contributing to real-time budget monitoring across 50+ events throughout the fiscal year.

UCSB Athletics-Division One Men's Soccer Team, Santa Barbara, CA

May 2024 – December 2024

Data Analysis Intern

- Delivered detailed post-match reports and visualizations using Python and SQL, directly informing weekly coaching strategies.
- Conceived complex data into accessible formats with video overlays, supporting effective team meetings and training sessions.
- Queried match datasets and visualized using pandas/matplotlib; delivered opponent scouting models used in coaching sessions.

LEADERSHIP & RESEARCH

Los Ingenieros- Society of Professional Engineers (SHPE), Santa Barbara, CA

May 2024 – June 2025

Financial Director

- Maintained financial records, ensuring clarity across transactions to enhance the academic and professional development of our SHPE Chapter of 150 members, while supporting efficient allocation of resources and strategic planning of funds.
- Secured more than \$7,000 in sponsorships through outreach, increasing member access to professional and networking events

Roberts Research Group, UCSB, Santa Barbara, CA

April 2024 – June 2024

Undergraduate Researcher

- Cleaned and analyzed qualitative datasets using R to identify bilingual learning trends for NSF-funded education equity research.
- Gathered findings into reports, helping the research team identify key patterns related to adaptive expertise in math teaching.

Smithsonian Scholars Program, UCSB, Santa Barbara, CA

June 2023 – August 2023

Undergraduate Research Program

- Conducted field research on Santa Cruz Island, collecting data to analyze trends in bird populations and environmental factors.
- Utilized R Studio to clean, visualize, and model population, producing our findings for the Smithsonian dataset.
- Presented technical findings to Smithsonian researchers, showcasing clear, data-informed insights into ecosystem changes

PROJECTS

Query-to-Insight Analytics Engine (2nd Place – Microsoft Innovation Challenge Hackathon, Spring 2026)

- Built a full-stack AI analytics platform using React, FastAPI, Azure OpenAI & SQL to convert English into secure SQL insights.
- Designed secure query workflows with role-based access control and validation layers to ensure privacy of generated SQL.
- Enabled non-technical users to extract insights from healthcare data, reducing analysis time from weeks to seconds.

Naval Submarine Lifecycle Modeling

- Built Python pipelines to analyze maintenance and lifecycle trends in large operational datasets.
- Developed Tableau visualizations to identify system failure patterns and support data-driven maintenance decisions.

Global Happiness Project

- Analyzed 2,100+ observations from 165 countries using R to model global well-being determinants.
- Built regression models with interaction terms to identify region-specific drivers of happiness.

EDUCATION

University of California, Santa Barbara, Santa Barbara, CA

September 2021 – September 2025

B.S. Applied Mathematics

TECHNICAL SKILLS

- **Programming & Libraries:** Python(pandas, NumPy, scikit-learn, matplotlib, PyTorch), R(ggplot2, tidyverse), SQL
- **Machine Learning & Analytics:** Regression, Classification, Clustering, PCA, Statistical Modeling, Monte Carlo Simulation
- **Tools & Platforms:** Anaconda, Jupyter Notebooks, Excel, Git/GitHub, Tableau, R Shiny App, Power BI
- **Languages:** English (Native), Spanish (Advanced)
